REASONS FOR ALLOWANCE

1. Claims 1-14 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Hutchins is deemed the closest prior art to Applicant's claimed invention, and discloses a pneumatically operated orbital sander having a feature for arresting movement of the sanding spindle for removal and replacement of the sanding head. A plunger(54) associated with the housing is actuated to fit into a corresponding notch(56) on the spindle, allowing the head to be removed manually without the need for tools. Valentini shows a similar device which employs a single plunger(26). Huber('511), and Huber('970) are cited to show other pneumatically operated orbital sanders. Borden, and Skubic are cited to show cam actuated clamping chucks having three chuck jaws which are moved radially inward to clamp a cylindrical member. Coffin, Sr. is cited to show clamping jaws with toothed ends for mating with, and gripping corresponding teeth on a spindle to be clamped. However, none of the references cited show or suggest the structure recited in Applicant's independent claim 1, in the context of an orbital sander, namely the bracket, hollow support tray, detent members including at least one arched toothed detent member, and rotary shaft with annular toothed section, which cooperate to secure the toothed spindle against movement during replacement of the sanding head.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, between 8:00-5:30.

5. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached at (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
